Note: Forward and Backward buttons are not available on MacOS.

Instructions

First Use

1. Take out the V-M1B mouse and turn on the bottom switch.

2. The V-M1B default mode is BT1 with its indicator light flashing slowly. Long press the mode switch button for 3sec, and the mouse will enter into bluetooth pairing state after the indicator light turns to flash quickly.

3. Turn on the bluetooth on your laptop or mobile device, for Windows 7 or earlier systems, please select 'V-M1B 3.0'. for Windows 8 or later systems, please select 'V-M1B 5.0'. you can start use after successfully connection.

Mode Switch

1. BT Mode: Short press the bottom mode switch button to switch the V-M1B mouse to BT2 mode. BT2 indicator light will flash slowly. Then refer to the BT1 connection steps for connection.

2. 2.4G Mode: Short press the bottom mode switch button to switch the mouse to 2.4G mode, and the indicator light will flash slowly. Plug the USB receiver in computer port, and the V1-M1B is workable after it's paired with computer automatically.

Solution for 2.4 Connecting Problems

Repeat the pairing steps after confirming that mouse is under in 2.4G mode. Press left button, right button and scroll wheel simultaneously for 3-5 seconds, and release them after the indicator light flashes quickly. Then plug USB receiver in computer port for pairing.

Solutions BT1/ BT2 Connecting Problem

Reboot the V-M1B mouse and empty the clear list on your computer. Repeat the connecting steps according to the instruction of BT1/ BT2 connection.

Note: If the product is still unworkable after above solutions, you could repeat those steps for few time. If your problem can't get resolved yet, please contact our customer support for help.
